About Event

Hackathon Challenge

AI can write a complete machine learning pipeline in seconds. But can you vouch for it?

In this half-day hackathon, co-hosted by [Probabl](#) and the [GLA Data for London Team](#) as part of [London Data Week 2026](#), participants will tackle real policy problems faced by the Greater London Authority, including youth employment, building decarbonisation, and open data discovery. The focus isn't just on training a model, but on being able to evaluate, explain, and vouch for it – a skill that's only becoming more important as AIs can generate ML pipelines in seconds.

Participants will be encouraged to use the Python library [skore](#) in their evaluations. The winning teams will get to pitch their solution to the GLA's data leadership team in the afternoon.

Note: Participants are asked to bring their own laptop.

Agenda

9:00-9:30: Doors open

Doors open at 9:00. We ask all participants to arrive before 9:30 so that we can start the fun on time.

9:30-10:00: Welcome

We'll start with welcome speeches and a demo of [skore](#). Participants will be asked to form teams of 2-4 and select the policy problem they want to tackle during the hackathon. The options include:

- Can we help London's young people find work, education, or training?
- How do we decarbonise London's buildings?
- How can we improve searching for London's data?

10:00-12:00: Hackathon

Teams tackle their chosen policy problem using provided datasets. Teams will be assessed on how well they can explain and evaluate their model and decision-making – whether the code was hand-written, AI-generated, or both.

12:00-13:00: Presentations & prizes.

Each team gives a short presentation of their approach. Prizes are given to the winning team per policy problem.

Prizes and Perks

- Winning teams (1x per policy problem): 100% discount code for [Skolar certification](#) + pitch solution to the GLA's data leadership team in the afternoon
- All participants: 100% discount code for the [Skolar Discovery certification](#) - a tangible credential for the CV and LinkedIn account, regardless of their hackathon result.
- Refreshments and lunch provided
- Networking with fellow data science practitioners and the Probabl and GLA data teams

Location

London City Hall

Kamal Chunchie Way, London E16 1ZE, UK
